NAS - Neural Access System

About

TODO Neural access system identifies and verifies individuals using EEG.

Installation & usage

This part of documentation represents process of installation and usage.

Installation

TODO requirements file ...

Usage

TODO python3.x main ...

nieco o config mozno ...

Configuration

Neural access system identifies and verifies individuals using EEG.

Modules

Modules

GUI

User file

```
class src.user.User (name, surname, login_name)
    Class for saving and loading user data.
```

name: string

name of user

surname: string

surname of user

login_name: string

ID of user used for login.

set_user_stimulus():

stimulus setter.

get_user_stimulus():

stimulus getter.

set_test_data():

test data setter.

get_test_data():

test data getter.

save_user():

Pickle user.

`get_test_data ()`

Test data getter.

`get_user_stimulus ()`

Stimulus getter.

`save_user ()`

Method to save user object as pickle.

`set_test_data (epochs, epochs_types)`

Test data setter.

`set_user_stimulus (stimulus)`

Stimulus setter

Parameters: **XXX** – neviem
